

## Reliable Temperature Control in XXL Format

XXL Pallet Shipper  
2 to 8°C

**Thanks to the new XXL Pallet Shipper 2 to 8°C from Storopack, temperature-sensitive shipping goods can now be dispatched on a Euro pallet to destinations previously reserved for actively cooled solutions.**

**Metzingen, April 2024.** Temperature-sensitive medications and biotech products demand perfect protection during transport, with the temperature reliably controlled. The new XXL Pallet Shipper 2 to 8°C from Storopack satisfies both requirements, enabling the temperature-controlled transport of an entire Euro pallet. By virtue of outstanding cooling performance, shipping goods are kept at a constant temperature of between 2 and 8°C for up to 120 hours, even at extreme outside temperatures ranging between –20°C and +60°C. What's more, users also benefit from rapid assembly. A single person can put together the XXL Pallet Shipper in just ten minutes, saving both time and cost.

### **Suitable for Several Weeks of Temperature-Controlled Storage**

The XXL Pallet Shipper 2 to 8°C boasts 16 cooling elements to ensure reliable temperature control: senders can use the same all-season packout and cooling element conditioning all year long, enabling the simple and efficient shipping of products requiring refrigeration. A unique benefit in terms of logistics is that this XXL pallet shipper can be stored in conventional cold-storage facilities without any loss of cooling power. This enables maximum flexibility, as it can be prepared well in advance of the shipping date. Even extended airport stopovers due to delays are no problem if the goods are stored correctly in the airport's cold-storage unit. Rapid assembly of the Storopack pallet shipper is facilitated by the click-in-place side sections as well as brackets for the reusable PCM cooling elements.

With the new XXL Pallet Shipper 2 to 8°C from Storopack, temperature-sensitive goods can now be shipped on a Euro pallet to destinations that were previously reserved for actively cooled solutions.
