

PAPERplus® Chevron, AIRplus® 100% Recycled, PAPERbubble® and several COMFORT.PACK integrations

## INCREASED ERGONOMICS AND MAXIMUM EFFICIENCY

Nanoprotect GmbH develops, produces and sells innovative material-protecting specialty products for wood and stone care as well as standard chemicals for home and garden, cars, and motorcycles. As an internationally active company, Nanoprotect has a worldwide customer base and supplies them from its central location in Dusseldorf, Germany.

**PRODUCTS:** Wood and stone care as well as standard chemicals for home and garden, cars, and motorcycles

**SCOPE:** two mobile packing stations with AIRplus® and PAPERbubble®  
one fixed packing area with PAPERplus® Chevron  
one fixed packing area with PAPERplus® Chevron and AIRplus®

**TOTAL OUTPUT:** 4000 boxes a day

## CHALLENGE - MORE OUTPUT IN THE SAME SPACE

The solution previously used at Nanoprotect could no longer meet the increased requirements for efficiency and ergonomics and the desired output could not be achieved.

*"We attach great importance to quality, reliability and expert advice. We have found all of this in Storopack as a partner."*

**MARCEL MUSIC,  
OPERATING MANAGER AT  
NANOPROTECT**

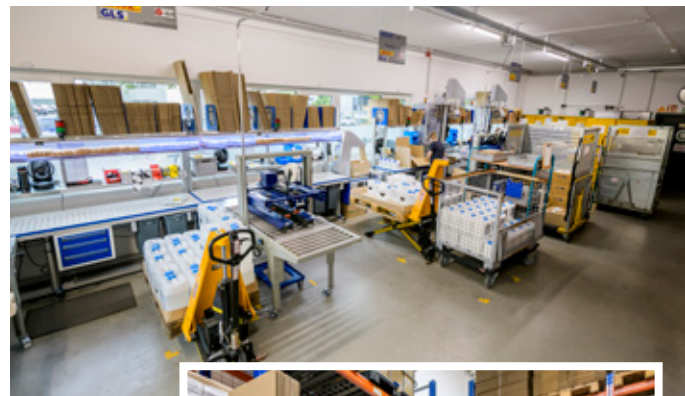

## SOLUTION - FIXED AND MOBILE COMFORT.PACK STATIONS WITH INTEGRATED PROTECTIVE PACKAGING SOLUTIONS

Storopack developed a solution for Nanoprotect with two packing areas, equipped with COMFORT.PACK stations and COMFORT.PROTECT modules.

For packaging, Nanoprotect uses PAPERplus® Chevron to secure heavy canisters in the carton. The integrated tube system makes it possible to supply five of the COMFORT.PACK stations with just two PAPERplus® Chevron machines.

For lighter products, Nanoprotect uses AIRplus® 100% Recycled. The integrated AIRplus® Mini machines equip three packing stations with air cushions via two silos.

At Nanoprotect, packaging takes place in three areas, all of which are equipped with sophisticated Working Comfort® solutions.

An added value to the new solution, the customer's existing box sealing machines are integrated into the new concept.

Two mobile COMFORT.PACK stations with PAPERbubble® paper cushions and AIRplus® air cushions, which are removed from a drawer with a brush system in the table top, were installed for maximum flexibility.

A mobile cardboard shelf in the packing area is used wherever it is needed.

## RESULT - IMPROVED ERGONOMICS AND EFFICIENCY

Thanks to the integrated protective packaging, the right material is always available for the different products. Walking distances, including for material procurement, have been significantly reduced. Nanoprotect can thus make optimum use of the limited space in the packing area and protect its products perfectly with minimal use of materials.

### STOROPACK - PERFECT PROTECTIVE PACKAGING

Wherever in the world you send your products, we want them to be well protected while in transit.

### ALL BASES COVERED

We at Storopack would like to offer our customers the very best, which is why we take great pride in the ability to listen, comprehensive consulting, and long-term services across all sectors. Our products and solutions are tailored specifically to your requirements. We support you until you achieve the ideal results and even beyond - locally around the world.
