

Holistically designed packaging processes

Storopack presents innovative solutions for efficient packaging processes in intralogistics at LogiMAT 2025

Storopack at LogiMAT
2025

Metzingen, January 2025: In line with the trade fair motto, "Passion for Solutions," visitors to LogiMAT 2025 in Stuttgart can expect a range of innovative solutions from Storopack. Whether an existing packaging area is to be expanded, modernized, or rethought from scratch, the protective packaging expert from Metzingen will be presenting forward-looking solutions that make the packaging logistics process significantly more efficient over the last 100 meters and increase productivity.

Storopack will be represented in Hall 6, Booth 6F40, from March 11 to 13.

For more ergonomics and automation

At the international trade fair for intralogistics solutions and process management, Storopack will be focusing on two key topics: automated packaging and further processing and manual packaging with subsequent semi-automated processing. Visitors to the trade fair will be able to see how shipping cartons are filled fully automatically with the optimum amount of packaging material, such as robust PAPERplus® paper pads. Storopack will also be demonstrating how manual packaging processes can be made more ergonomic and efficient: With the AIRplus® air cushion systems, air cushions are quickly supplied and inserted at a modern workstation, while a semi-automated carton sealer supports further processing. At its trade fair booth, Storopack will be demonstrating how these processes work in detail and the resulting productivity benefits.

Tailored solutions

Visitors to the booth can also find out more about the protective packaging specialist's entire product portfolio and solutions for various industries. As a global family-owned company, Storopack boasts extensive expertise in flexible protective packaging and advises on the optimum packaging process. Another advantage: customers buy directly from the manufacturer at Storopack.

At LogiMAT 2025, protective packaging specialist Storopack from Metzingen will be showcasing innovative solutions that make the entire packaging logistics process more efficient and increase productivity in both manual and automated packaging.
